Dear Sir or Madam,

I hope the US Justice department will bring the Microsoft ordeal to a speedy end. It seems we have a number of people only interested in lawsuits as opposed to getting rid of barriers to business in our country. Microsoft is providing leadership, employment, innovation, and most of all a commitment to America through grant programs. I just had dinner with an incredible young woman who has gone through college and post graduate degrees all with the help of the Gates foundation. Lets not penalize success. It is the American dream.
